

NAT's

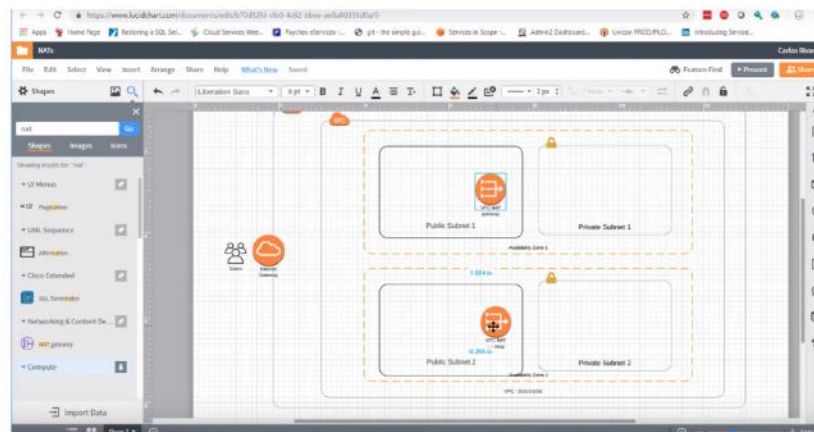

1. Search the shapes panel for `VPC_NAT gateway`.

2. Drag the `VPC_NAT gateway` shape onto your canvas and place it directly inside `Public Subnet 1`.

3. Repeat step 3, but instead place your new `VPC_NAT gateway` inside of `Public Subnet 2`.

Add NAT Gateways to your Diagram

- ☐ Add a new VPC_NAT gateway directly inside Public Subnet 1
- ☐ Add a new VPC_NAT gateway directly inside Public Subnet 2

☐ Add a new EC2 instance gateway directly inside EC2 instance.
